ADITYA UNIVERSITY

DEPARTMENT OF COMPUTER APPLICATIONS

CERTIFICATE

This is to certify that the internship report entitled "**Web Development in php & mysql**" is being submitted by **G.Uma Sri – 25M11MC038** in partial fulfillment of the requirements for the award of the degree of **Master of Computer Applications** in the **Department of Computer Applications** for the academic year **2026–2027**. This report is based on the internship carried out at **Apex planet software Pvt.Ltd**, and it reflects the student's own work, conducted under our guidance and supervision.

Guide/Supervisor Name

Y.Sasikalala

Assistant professor

Head of the Department

Dr. Ramesh N S V S C Sripada

Associate Professor & HOD

DECLARATION

I hereby declare that the internship report entitled “**Blog Management System**” is a genuine and original work submitted to **Aditya University, Surampalem**, in partial fulfillment of the requirements for the award of the **Master of Computer Applications (MCA)** degree.

I further declare that this report has not been submitted, either in full or in part, for the award of any degree or diploma at this or any other educational institution.

Garaga Uma Sri

25M11MC038

INTERNSHIP CERTIFICATE

CERTIFICATE OF COMPLETION

INTERNSHIP PROGRAM

This is to certify that

UMA SRI GARAGA

has successfully completed the **Internship Program** at **ApexPlanet Software Pvt Ltd** in the domain of **WEB DEVELOPER IN PHP & MYSQL** from **21 May, 2026** to **04 July, 2026** under the guidance of ApexPlanet Software Pvt. Ltd.

Duration: 6 Weeks & 2 Days| Mode: Virtual/Online

During the internship period, the intern actively participated in assigned tasks, project development activities, and practical learning exercises.

We appreciate the dedication and efforts shown throughout the internship and wish them success in future endeavors.

Authorized Signatory
Founder & CEO, ApexPlanet Software Pvt. Ltd.

Certificate ID: AP5PL2634726

ACKNOWLEDGEMENT

First and foremost, I would like to express my sincere gratitude to the Director of **ApexPlanet Software Pvt. Ltd**, for providing me the opportunity to undertake my internship within the organization. I am also thankful to all the team members at **ApexPlanet Software Pvt. Ltd** for their patience, cooperation, and the friendly work environment they created, which made the experience truly enjoyable.

It is with immense pleasure that I express my sincere thanks to **Mr. Agni Tanmaya Behera**, Assistant Professor and Internship Coordinator, for coordinating the internship process and facilitating the smooth submission and evaluation of reports.

I am deeply grateful to **Dr. Ramesh N S V S C Sripada**, Head of the Department (Computer Applications), for his motivation, support, and for arranging all the necessary facilities and resources for the smooth execution of my internship project.

I also wish to extend my sincere thanks to **Y.Sasikala**, Assistant Professor, my project guide, for her encouragement, valuable feedback, and consistent support throughout my internship.

I am thankful to the respected leadership of Aditya University for their unconditional support and for providing world-class infrastructure and state-of-the-art laboratories. My sincere thanks to:

- **Dr. N Satish Reddy**, Pro-Chancellor
- **Dr. M Sreenivasa Reddy**, Dy. Pro-Chancellor
- **Dr. M. B. Srinivas**, Vice Chancellor
- **Dr. S Rama Sree**, Pro Vice-Chancellor (Academics)
- **Dr. A Ramesh**, Pro Vice-Chancellor (Engineering & Sciences)
- **Dr. G Suresh**, Registrar
- **Dr. M V Rajesh**, Associate Dean (School of Computing)

Lastly, I would like to thank all the **faculty members, lab technicians, non-teaching staff**, and my **friends** who directly or indirectly helped and supported me in successfully completing my internship project on time.

ABOUT ORGANIZATION

ApexPlanet Software Pvt.Ltd is a software development and IT training company that focuses on providing practical learning opportunities through internships and real-time projects. The organization helps students and fresh graduates develop industry-relevant technical skills by offering structured internship program in domains such as Web Development ,python programming ,java development , Data Science, Artificial intelligence, Machine Learning and other engineering technologies.

Mission

To provide high-quality technical education and industry -oriented training that equips students and professionals with practical software development skills , enabling them to build innovative and secure applications and prepare for successful careers in the IT industry.

Vision

To become a leading organization in technology education and software development by empowering learners with real-world experience, fostering innovation and creating skilled professionals capable of meeting the evolving demands of the global technology industry

KEY INITIATIVES

ApexPlanet Software Pvt. Ltd. conducts project-based internship programs that provide students with practical exposure to real-world technologies. The organization offers training in various technical domains and encourages students to build projects that strengthen their understanding of software development. It also promotes self-learning, creativity, and teamwork through structured assignments and continuous guidance.

Recognition and Impact

ApexPlanet has helped many students improve their technical knowledge by providing practical learning opportunities. Through hands-on projects and internships, students gain industry exposure, improve their coding skills, and build professional portfolios that enhance their employability and career readiness.

Leadership

The organization provides a structured learning environment where mentors guide students throughout their internship journey. By encouraging discipline, innovation, and continuous improvement, ApexPlanet helps students develop both technical and professional skills required in the IT industry.

OVERVIEW

ApexPlanet Software Pvt. Ltd. is an IT company that provides software development services and industry-oriented internship programs. It focuses on enhancing students' technical skills through hands-on projects and practical training. The organization emphasizes modern technologies, innovation, and real-world learning to prepare students for successful careers in the software industry.

KEY PROJECT: Blog Management System

The Blog Management System is a web application developed using PHP, MySQL, HTML, CSS, Bootstrap, and JavaScript. It enables users to register, log in, create, edit, delete, and manage blog posts through a secure interface. The project also includes advanced features such as search, pagination, prepared statements, password hashing, form validation, and role-based access control, providing a secure and user-friendly blogging platform.

ABSTRACT

This internship focused on the design and development of a Secure Blog Management System using PHP, MySQL, HTML, CSS, Bootstrap, and JavaScript. The project was carried out at ApexPlanet Software Pvt. Ltd. to gain practical experience in web application development and database management. The application provides user registration, secure login, blog creation, editing, deletion, search functionality, pagination, and role-based access control using prepared statements and password hashing for enhanced security. Throughout the internship, modern development tools such as XAMPP, phpMyAdmin, Git, Git Bash, GitHub, and Visual Studio Code were used for development, testing, and version control. This internship enhanced my technical knowledge, problem-solving abilities, and practical software development skills, preparing me for future opportunities in the IT industry.

WEEK 1 REPORT

1st Week	DATE	DAY	NAME OF THE TOPIC / MODULE COMPLETED
	21-05-2026	1	Internship Orientation, Project Introduction & Development Environment Setup
	22-05-2026	2	Installation and Configuration of XAMPP, Apache and MySQL
	23-05-2026	3	Installation of Visual Studio Code, Git and Git Bash
	25-05-2026	4	GitHub Account Setup, Git Repository Creation and Initial Commit
	26-05-2026	5	Database Creation (blog), phpMyAdmin Configuration and Database Connectivity
	27-05-2026	6	Project Folder Structure, Basic PHP Files and Environment Verification

Overview:

During the first week of the internship, I set up the complete development environment required for the Blog Management System project. I installed and configured XAMPP, Visual Studio Code, Git, and Git Bash, and created a GitHub repository for version control. I also created the blog database in phpMyAdmin, established the database connection using PHP and MySQL, and organized the project structure. These activities completed the development environment setup required for the internship.

Conclusion:

The first week provided a strong foundation for the project by successfully configuring the development environment, database, and version control system. This preparation ensured that the project was ready for implementing user authentication and CRUD operations in the following weeks.

WEEK 2 REPORT

2nd Week	DATE	DAY	NAME OF THE TOPIC / MODULE COMPLETED
	28-05-2026	1	Database Design and Creation of Users and Posts Tables
	29-05-2026	2	Development of User Registration Module
	30-05-2026	3	Development of User Login Module with Session Management
	01-06-2026	4	Password Hashing and User Authentication
	02-06-2026	5	Database Connectivity using PHP and MySQL
	03-06-2026	6	Testing User Registration and Login Functionality

Overview:

During the second week of the internship, the primary focus was on developing the user authentication module for the Blog Management System. The **users** and **posts** tables were designed and created in the MySQL database using phpMyAdmin. User registration and login pages were developed using PHP, and secure authentication was implemented with password hashing and session management. Database connectivity was established using PHP and MySQL, and the authentication modules were tested to ensure proper functionality. These activities align with **Task 2: Basic CRUD Application with User Authentication** in the internship schedule.

Conclusion:

By the end of Week 2, the user authentication system was successfully implemented. Users could securely register, log in, and access the application through session-based authentication. This provided the foundation for implementing CRUD operations on blog posts in the following week.

WEEK 3 REPORT

3rd Week	DATE	DAY	NAME OF THE TOPIC / MODULE COMPLETED
	04-06-2026	1	Development of Create Blog Post Module
	05-06-2026	2	Implementation of View Blog Posts (Read Operation)
	06-06-2026	3	Development of Edit Blog Post (Update Operation)
	08-06-2026	4	Implementation of Delete Blog Post Functionality
	09-06-2026	5	Dashboard Development and User Session Integration
	10-06-2026	6	Testing CRUD Operations and Bug Fixing

Overview:

During the third week, the core functionalities of the Blog Management System were developed by implementing all CRUD (Create, Read, Update, and Delete) operations. Users were able to create, view, edit, and delete their blog posts through a secure dashboard. Session management was integrated to ensure that only authenticated users could access and manage their own posts. The CRUD modules were thoroughly tested, and identified issues were resolved to improve the application's reliability and performance. These activities completed the major functional requirements of the blog management system.

Conclusion:

By the end of Week 3, all CRUD operations had been successfully implemented and integrated into the dashboard. The application was capable of securely managing blog posts, providing users with a complete and functional blogging platform. This formed the foundation for implementing advanced features such as search, pagination, and user interface enhancements in the following week.

WEEK 4 REPORT

4th Week	DATE	DAY	NAME OF THE TOPIC / MODULE COMPLETED
	11-06-2026	1	Implementation of Search Functionality for Blog Posts
	12-06-2026	2	Pagination Implementation Using PHP and MySQL
	13-06-2026	3	Responsive User Interface Design Using Bootstrap
	15-06-2026	4	Dashboard and Navigation Improvements
	16-06-2026	5	Integration of Search and Pagination Features
	17-06-2026	6	Testing and Bug Fixing for Advanced Features

Overview:

During the fourth week of the internship, advanced features were implemented to enhance the functionality and user experience of the Blog Management System. A search feature was developed to allow users to quickly find blog posts based on keywords. Pagination was implemented to display a limited number of posts on each page, improving application performance and usability. The user interface was enhanced using Bootstrap by designing responsive layouts, navigation menus, buttons, and cards. Finally, all advanced features were integrated and thoroughly tested to ensure smooth and errorfree operation.

Conclusion:

By the end of Week 4, the Blog Management System had become more efficient and user-friendly with the successful implementation of search functionality, pagination, and responsive user interface improvements. These enhancements significantly improved the overall user experience and prepared the application for the implementation of security features in the following week.

WEEK 5 REPORT

5th Week	DATE	DAY	NAME OF THE TOPIC / MODULE COMPLETED
	18-06-2026	1	Implementation of Prepared Statements for Database Queries
	19-06-2026	2	Server-side and Client-side Form Validation
	20-06-2026	3	Password Hashing and Secure User Authentication
	22-06-2026	4	Role-Based Access Control (Admin and Editor)
	23-06-2026	5	Security Testing and SQL Injection Prevention
	24-06-2026	6	Code Optimization and Bug Fixing

Overview:

During the fifth week, the primary focus was on enhancing the security of the Blog Management System. Prepared statements were implemented in all database operations to protect the application from SQL injection attacks. Both client-side and server-side form validation were added to ensure that user input was accurate and secure. Password hashing was used to securely store user passwords, and role-based access control was implemented to differentiate between Admin and Editor users. The application was thoroughly tested to verify the effectiveness of the implemented security measures, and the code was optimized by fixing identified issues.

Conclusion:

By the end of Week 5, the Blog Management System had become more secure and reliable through the implementation of prepared statements, input validation, password hashing, and rolebased access control. These security enhancements improved the overall protection of user data and ensured safe access to the application's features, preparing the project for final testing, documentation, and deployment in the last week.

WEEK 6 REPORT

6th Week	DATE	DAY	NAME OF THE TOPIC / MODULE COMPLETED
	25-06-2026	1	Final Integration of All Project Modules
	26-06-2026	2	Functional Testing and Bug Fixing
	27-06-2026	3	Project Documentation and README Preparation
	29-06-2026	4	GitHub Repository Update and Version Control
	30-06-2026	5	Demo Video Recording and Final Project Review
	01-07-2026	6	Project Submission and Internship Completion

Overview:

During the sixth and final week of the internship, all modules of the Blog Management System were integrated into a complete web application. Functional testing was performed to verify user registration, login, CRUD operations, search, pagination, security features, and role-based access control. The identified issues were resolved through debugging and code optimization. Project documentation, including the README file, was prepared, and the source code was uploaded to GitHub using Git and Git Bash. Finally, a demonstration video was recorded, and the project was reviewed and submitted as part of the internship requirements.

Conclusion:

The successful completion of Week 6 marked the completion of the Blog Management System project and the internship. Through this internship, I gained practical experience in PHP, MySQL, Bootstrap, XAMPP, Git, Git Bash, and GitHub while learning secure web application development, database management, testing, debugging, and documentation. The internship significantly enhanced my technical skills, problem-solving abilities, and understanding of the software development lifecycle, preparing me for future opportunities in the IT industry.

OVERALL OUTCOMES

The **Blog Management System** project was successfully developed by integrating all the required functionalities into a secure and user-friendly web application. The application allows users to register, log in, create, view, edit, and delete blog posts through a responsive interface. Advanced features such as search, pagination, prepared statements, password hashing, form validation, session management, and role-based access control were successfully implemented to improve functionality and security. The project was thoroughly tested to ensure smooth performance and reliable operation. Version control was maintained using **Git**, **Git Bash**, and **GitHub**, while **XAMPP** and **phpMyAdmin** were used for local development and database management. The successful completion of this project demonstrated the practical implementation of web development concepts and resulted in a secure, responsive, and fully functional Blog Management System ready for deployment and future enhancements.
